

Stages of the Cannabis Plant

Clone stage

Vegetative stage

Budding / Flowering

Common Equipment and Hazards in Cannabis Grow Operations

Electrical Diversions

Electrical ballasts, industrial timers, relay switches, fuse panels, loose wiring

Electrical diversions

Exposure to a lethal amount of electrical energy

Loose wires may be hanging from walls or ceilings causing a tripping hazard

Gas, Chemicals and Mould

Carbon dioxide burner and propane tanks

Water drums and chemicals / fertilizers

Used plant pots and discarded soil

Mould

May cause serious and prolonged health effects on short and long-term exposure (skin corrosion / air quality)

Fans and Vent Ducting

Oscillating fans

Air conditioners

Lamps and Lights

Intensity discharge lamps

Tesla lights (LED)

Moving part can crush and cut

Burn hazard (hot surface)
